Access Code

An access code is a password/pin that prevents unauthorized changes to your entity. It is not the same as that password that is used to login to your account. You can set your own access code or request one by using the new message feature within the Corporate Registry Application.

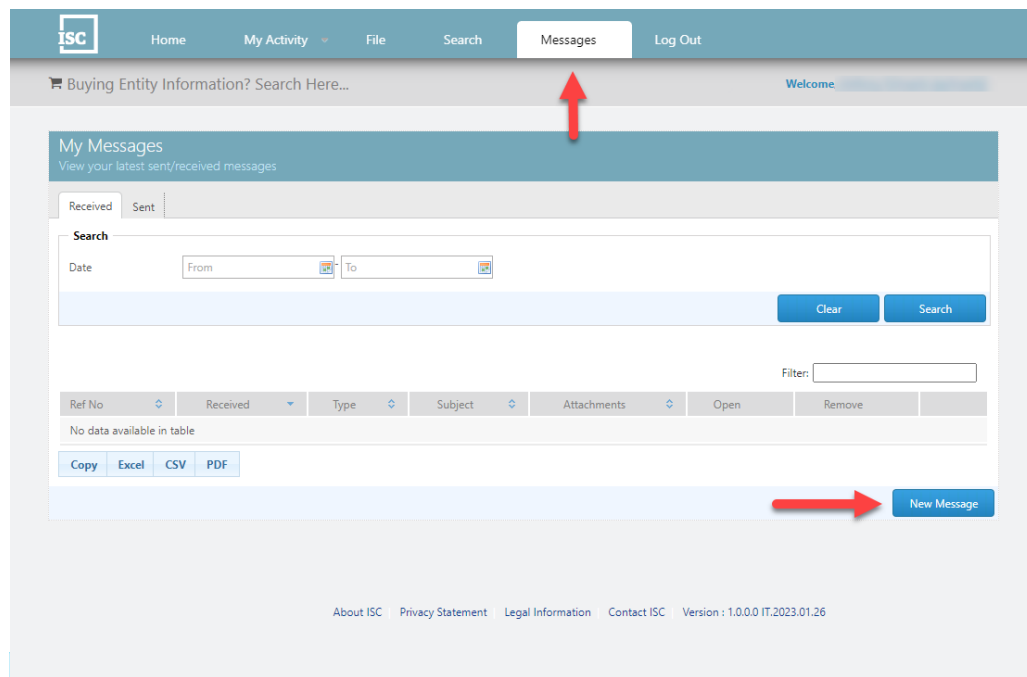

Annual Returns/Renewals

If you are filing your annual return or renewal, the annual return or renewal notice will contain your access code for your entity. The entity access code contains letters and numbers (e.g., A2BBZZZ345) there is no need to set a new code if you are using this access code.

If you have a filing that you wish to complete and do not have an access code, you may request and set an access code.

Request and Set an Access Code

If you wish to request a new access code, select the **Messages** Tab, and then click on **New Message**.
