Purpose

To obtain access to the ISC Land Search API, the first step is to obtain approval by the Saskatchewan Registrar of Titles and the Registrar of Personal Property Security. ISC facilitates this process by having the customer complete and submit this Application Form to ISC. Please provide responses to the following questions so that ISC can review the nature and reason for your request for the ISC Land Search API.

## Applicant Name and Contact

Date:

Legal Entity Name and Address:

Contact Name:

Contact Email Address:

Contact Phone Number:

Applicant Business Information

1. What is the nature of your business?

2. What type of products & services do you offer?

3. Describe the software that will be communicating with the Search API.

Data Requested

1. What types of registry data are you requesting?

2. Describe how you will update your terms and conditions, and privacy policy to reflect use of the Search API.

Action Step: Please provide the legal terms and conditions and privacy policy that you require your end user customers to agree to in order to receive your services.   Attach a current version of these documents to the email with this completed form.

Data Usage

1. How will you be managing and storing the registry data (include data retention and destruction processes)?

2. How will you be passing the registry data through to the end users?

Security and Storage of data

1. Where and how will you be storing the registry data?

2. What format will you be storing the registry data in?

3. How will you maintain the security of the registry data?

4. How will end users access the registry data?
